

TUTORIAL DE ACESSO

# REDE VPN

MAC OS

**UDESC**  
CEART

## Configuração da VPN

Siga os passos abaixo para estabelecer a conexão usando um computador com **sistema operacional Mac OS**.

**1**

Clique no link a seguir ou copie e cole no seu navegador para começar:

<https://wiki.udesc.br/>

. Navegue em “Página de auxílio aos usuários” e em seguida “Acesso VPN”.

# 2

Na página que irá abrir, clique no botão “macOS”. Em seguida, execute o arquivo;

The screenshot shows a web browser window displaying the UDESC Wiki page for downloading and installing FortiClient VPN. The page is titled "1 - Baixe o software conforme o seu sistema operacional" (Download the software according to your operating system). It features a grid of buttons for different operating systems: Windows, macOS, Linux, iOS, Android, and Linux (deb). A red arrow labeled "01" points to the "macOS FortiClient VPN" button. A download bar at the top right shows the file "FortiClientVPN\_7.4.3.1761\_OnlineInstaller.dmg" (5.6 MB) has been downloaded. Below the download bar, the page continues with "2 - Instale o software no seu dispositivo." (Install the software on your device.) and shows a sequence of five installation wizard screenshots with red arrows indicating the steps: "FortiClient Online Installation", "Welcome to the FortiClient VPN Setup Wizard", "Select a folder", "Select a folder", and "Completed the FortiClient VPN Setup Wizard". The final step is "3 - Execute o cliente da VPN" (Execute the VPN client), which instructs the user to find the FortiClient icon in the taskbar or use the command "forticlient" in the terminal.
