Structure and organization of the "*Work Paper*" (adapted from Cristiano Cunha, 2016)

The "*Work Paper*" must be written in four sections:

- I) Introduction
- II) Development
- III) Conclusion
- IV) Documentation

I) **Introduction:** The purpose of this section is to introduce the reader into the question or theme dealt with in the "*paper*". The author should explain to the reader what he is writing. However, there is no unique way to do this. Each *work paper* is a little different. It is necessary for the author to select the best way to enter your article to the reader. For example:

- You can provide some basic information on the topic.
- You can tell why you're writing about that issue.
- You can show the importance of the theme.

II) **Development:** This is your current position. In other words, this is the section in which you tell the reader something. You should be sure to organize development so that the reader can easily follow your thinking. The purpose of the *workpaper* is to present and substantiate your point of view and not seek to impress the reader with their vast knowledge or with a far-fetched and difficult literary style to understand. Development should be detailed without being confused and should include appropriate examples and should, above all, be well articulated from a logical point of view and based on the literature. In this discipline, the WP aims to stimulate reading to promote content in classroom discussions and in the elaboration of academic Activities and Work Papers. No individual feedback on the delivered texts will be provided.

III) **Conclusion:** In the introduction you told the reader what you would present. In development, you have presented a particular theme. In conclusion you should summarize the main points that served as the basis for your argumentation and synthesize your entire paper into a final statement.

IV) **Documentation** (including citations and cited works): You must include the texts or interviews that gave rise to the quotations used to build the paper and the *texts* consulted, quoting the pages.

Format: Page format: paper format A-4 (29.7 x 21 cm)

Margins: top 3cm; bottom: 2cm; left: 3cm; right: 2cm

Word text editor for Windows

Spacing: space 1.5

Number of pages: 2 pages written
